#### Phillip Island Nature Parks

Phillip Island is part of the UNESCO Western Port Biosphere Reserve and encompasses wildlife sanctuaries, wetlands, woodlands and breathtaking coastlines which are protected and managed by world-renowned environmental and research programs. Habitat within Phillip Island Nature Parks supports significant populations of little penguins, hooded plovers, short-tailed shearwaters and other international migratory bird species, and mammals such as koalas, possums, wallabies, Australian fur seals and bats.

#### Penguin Parade

The Summerland Peninsula in the south-west of Phillip Island is home to an estimated 32,000 little penguins – one of the largest colonies in Australia. The Penguin Parade represents approximately 10 per cent of the colony. Each night at sunset, little penguins (numbering in the hundreds or thousands depending on the season) make the march across the beach and return to their burrow homes in the sand dunes.

#### **Fun Facts**

- · Little penguins are the smallest of the 17 penguin species and the only penguin that lives permanently in Australia.
- There are approximately 32,000 breeding penguins on Phillip Island.
- The first tourists visited the Penguin Parade in the 1920s.
- In 1955 the State Government established a large reserve over the penguin colony.
- The Little Penguin Scientific Advisory Committee was formed in 1966 and penguin counts and research programmes began.
- The Phillip Island Nature Parks were established in 1996.
